Confirmation Language of Instruction and Study Structure

To whom it may concern,

This is to confirm that in our master's program in Medical Engineering, the language of instruction of the three branches of study "**Medical Image and Data Processing**", "**Health and Medical Data Analytics**" and "**Medical Robotics**" is English. Therefore, students who were admitted to our Medical Engineering program for one of the mentioned specializations are not required to prove any German skills. Notwithstanding, German skills are of paramount importance to ensure the student's successful integration into the German job market as well as the university community. Students are therefore expected to take German courses during their studies.

The standard duration of our master's program in Medical Engineering is **4 semesters (2 years)**, meaning that students who start their studies on Oct 1 2026 are expected to **graduate by September 30 2028. This can only be achieved if students don't work part-time but concentrate full-time on their studies.**

FAU currently does not charge tuition fees but an **administrative fee of (currently) 72 Euros** has to be paid by the student each semester together with re-registration. These data can be subject to changes.

Kind regards,

Claudia Barnickel

Study Coordinator Medical Engineering
